

Three new vendors opened on Lobdell dining, Stud second

Mostly positive reviews from visitors, some critiques regarding food prices

By Kristina Chen
EDITOR IN CHIEF

Three new retail dining vendors — BibimBox, Carolicious, and Las Palmas — opened in the Lobdell Dining Hall in the Stratton Student Center Sept. 9.

A preview of the restaurants took place Sept. 8, when “hundreds of students and community members got to sample the vendors’ food,” Director of MIT Dining Mark Hayes wrote in an email to *The Tech*.

Students voted on which vendors would replace Cafe Spice, Shawarma Shack, and Shinkansen Bullet Train in May 2021 as part of the Commonwealth Kitchen Launchpad; MIT is partnering with Commonwealth Kitchen, a non-profit food business incubator, to support local, minority-owned businesses.

A sign in Lobdell Dining reads that the goal of the partnership is to “bring diverse, authentic flavors” to MIT while also “creating powerful opportunities for local BIPOC-owned food businesses.”

Bibim Box serves entrées inspired by Korean cuisine with prices ranging from \$9.99–12.99. Las Palmas serves Dominican food, with entrées ranging from \$9–12. Carolicious serves Venezuelan arepas and bowls, with prices from \$7.50–13.50.

The vendors also each have their own selection of drinks and desserts.

Hayes wrote that “early feedback on social media has been positive” and that MIT Dining is working with the Undergraduate Association to include retail dining locations in its dining satisfaction survey.

With the opening of the Commonwealth Kitchen Launchpad, students have three new and accessible options for food in the Student Center.

ASEs taken virtually for Class of 2025

18.01 ASE sees increase in exam takers due to change in credit criteria

By Daisy Wang
STAFF REPORTER

Advanced Standing Exams (ASE) were administered virtually Aug. 2–18 before orientation this year. The ASEs offered this year were Principles of Chemical Science (5.111), Introduction to Computer Science and Programming in Python (6.0001), Introductory Biology (7.01x), Physics I (8.01), Physics II (8.02), Physics III (8.03), Quantum

Physics I (8.04), Single Variable Calculus (18.01), Multivariable Calculus (18.02), Differential Equations (18.03), and Linear Algebra (18.06).

Elizabeth Young, associate dean and director of first-year advising and programming, provided the 2021 ASE data in an email to *The Tech*.

For math ASEs, the department provided two online sittings for each test, along with an extra in-person sitting for 18.01.

810 students took the 18.01 ASE, with 524 students passing it completely, and 168 students passing the first portion only. Students who passed the first portion only were eligible to take 18.01A.

Vastly more students wrote the 18.01 ASE than in past years (180 students took the exam last fall) because MIT changed its criteria for receiving 18.01 credit “due to difficulties with pandemic testing and evaluation.” According to

Young, “The only way to obtain credit for 18.01 from prior work for this year’s entering class was to pass the 18.01 ASE (or be awarded transfer credit if a comparable subject was taken at another university).”

In previous years, students could receive credit for 18.01 by earning a score of 5 on the Advanced Placement Calculus BC exam and receiving

ASEs, Page 2

IN SHORT

Sept. 17 is the **last day to add half-term subjects** taking place in the first half of the term.

HackMIT will take place on campus and virtually Sept. 18–19.

Career Exploration Week will take place Sept. 20–23.

Send news and tips to news@tech.mit.edu.

Guests of MIT Staff may access campus via new Tim Tickets

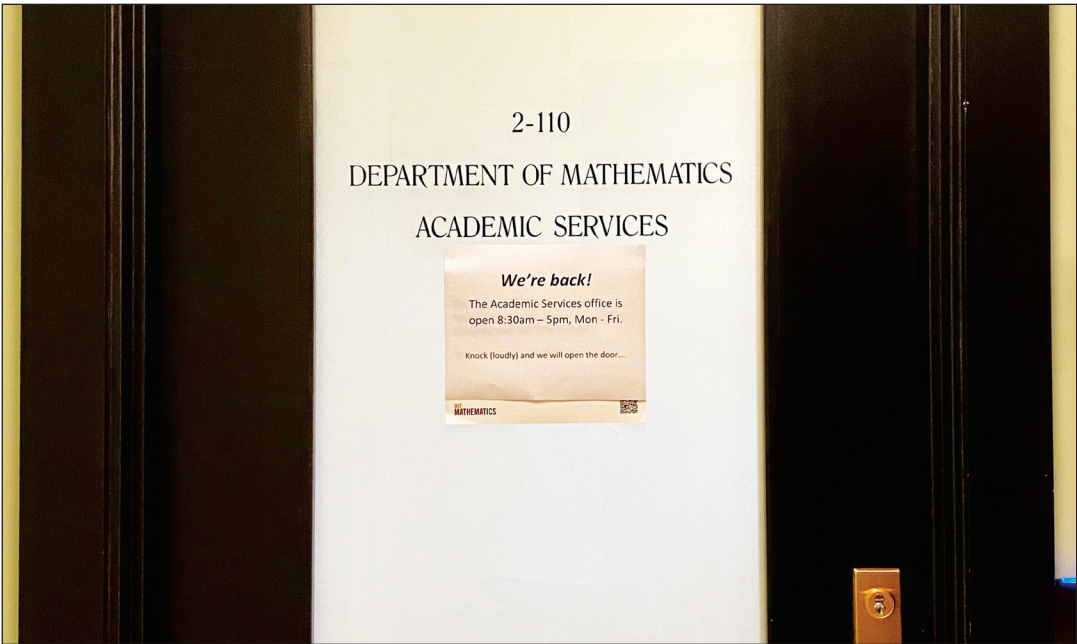

Tim Tickets, MIT’s new visitor pass system, grants guests of some COVID Pass participants temporary, unescorted access to campus buildings. The ticket, a QR code, collects basic information about visitors entering buildings while providing MIT staff and employees a convenient way to invite guests.

When registering for a Tim Ticket, visitors are asked to provide phone number, email address, and COVID-19 vaccination status. On the day of the visit, guests must complete a health attestation regarding health and vaccination status before using the ticket to access buildings. A Tim Ticket invitation is valid for seven consecutive days. Upon expiry, the MIT host may send a new invitation.

Visitors may access campus from 6 a.m.–6 p.m.; buildings 18, 31, 46, 54, 68, 76, E14, E15, NE47, NE49, NW14, NW17, NW21, W16, W59, W97, and W98 may be accessed only Monday through Friday, while all other buildings can be accessed seven days a week. Tim Ticket holders must use doors equipped with QR code scanners — not to be confused with ID card readers — to enter. A map of access points is accessible to hosts and visitors.

The MIT Tim Tickets mobile app is available for iOS 13+ and Android 7+, and can be downloaded on the respective app stores. Additionally, a Tim Tickets web application is available and works on most recent browsers.

WEATHER

Showers shaping summer’s shadow

By Phoebe Lin
STAFF METEOROLOGIST

A few showers are forecast to pass by Boston on the way to a sunny weekend yet again! What a way to transition into the fall. If chance showers don’t float your boat, make sure to wait until the weekend to pursue some outdoor activities. (And remember to pack a brolly!) If you enjoy a good rainstorm, this is the perfect time for you — personally, I recommend rain as the perfect backdrop to a productive pset-

ting, as long as you don’t keep your window too wide open.

Meanwhile on the Gulf Coast, Tropical Depression Nicholas is causing more chaos on the tail end of Ida’s destruction. Tropical storms are no joke, and this hurricane season is already well on its way to exceeding several historic records. The Pacific Northwest is finally getting its share of heavy rain with a large storm expected to travel through Washington and Oregon and potentially bring the first snow of the season.

Extended Forecast

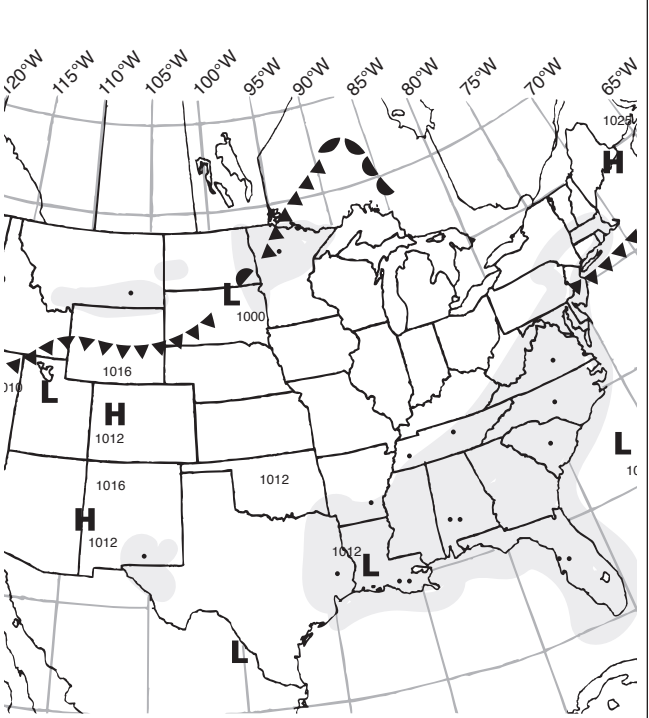

Today: Chance of showers in the afternoon; patchy fog in the morning. High around 72 °F (22 °C). Winds in the east, 8–11 mph.

Tonight: Chance showers and mostly cloudy. Low around 65 °F (18 °C). Winds 6–8 mph in the northeast.

Tomorrow: Chance of showers, then mostly cloudy. High around 72 °F (22 °C) and low around 65 °F (18 °C). Winds 6–9 mph in the northeast, turning east in the evening.

Saturday: Mostly sunny. High around 74 °F (23 °C) and low around 64 °F (18 °C). Winds 6–8 mph in the north.

Sunday: Mostly clear with a slight chance of showers. High around 74 °F (23 °C) and low around 60 °F (16 °C). Winds 6–10 mph, becoming lighter in the evening.

Situation for Noon Eastern Time, Thursday, Sept. 16, 2021

Paik: Lobdell interior “much brighter” than before

Dining, from Page 1

The Tech also spoke with students dining at Lobdell about their experiences with the new vendors.

Kevin Pho ’22 said in an interview with *The Tech* that after trying food from all the vendors, he would be most likely to order from Las Palmas. Pho added that he felt the prices at the three new vendors were higher and the portion sizes were smaller than those of the previous vendors.

Pho also noted that he preferred those more affordable options when seeking a meal at Lobdell.

Anirudh Rahul ’24 wrote in an email to *The Tech* that while he appreciates “the unique Korean perspective Bibim[Box] provides, its prices do seem a bit high.”

Rahul also added that though BibimBox’s “menu does seem to have a lot of options, it seems like only a few options on the menu are actually meant to be ordered.”

Teresa Xiao, a cross-registered student at Wellesley College, said in an interview with *The Tech* that the food served in Lobdell Dining is “really good, compared to the food at Wellesley.”

Andrew Hutchison ’25 said in an interview with *The Tech* that he appreciates the “different cultural

foods” in Lobdell Dining and the variety from dining hall food. Hutchison added that the food at Lobdell was better than in his dining hall.

In addition to new restaurants’ opening, the interior of Lobdell Dining has been updated with new furniture and a mural by Boston-based Colombian artist Felipe Ortiz. The mural, created specifically for Lobdell, features scenes of nature and includes butterflies and birds native to Korea and Latin America to represent the cuisine served by the vendors.

Haemin Paik, a postdoctoral associate, said in an interview with *The Tech* that the changes made to

Lobdell Dining are an improvement from when it was last open in Spring 2020. “The interior is much brighter. I was reluctant to come before, but it is better now.”

The three newly-opened vendors are all open from 11:00 a.m.–7:00 p.m. on weekdays; Las Palmas remains open until 8:00 p.m. on Tuesdays. While none of the vendors are open on weekends, Hayes wrote that MIT Dining hopes to “announce a rotating weekend schedule for Launchpad vendors” online and on social media. Students can find updated information about retail dining at the Division of Student Life’s website.

FPOPs conducted on campus after virtual events last fall

First-Year Pre-Orientation Programs (FPOP) were held on campus Aug. 23–28 or 29. All FPOP events were virtual last fall.

In total, 549 students participated in 23 FPOPs.

First Year Advising Associate Dean and Director Elizabeth Young wrote in an email to *The Tech* that some FPOPs were “not held” due to “various COVID reasons.” Discover Aerospace, Freshman Leadership Program, First-Year Outdoors Program, Discover Earth Atmospheric and Planetary Sciences (Yellowstone), Discover UROP, and Discover Finance were not conducted.

Young wrote that “helping departments adjust for eating and finding outdoor locations” was challenging when planning in-person FPOPs. The programs

had to make commitments in May “knowing that different policies and procedures may be in place in August.”

Kevin Yang ’22, Discover Physics (DP)’s counselor, said in an interview with *The Tech* that COVID cut down on the budget for planning FPOPs. The team had to “get rid of a few events” and saw a decrease in the food budget. Yang said they still kept the “iconic events” such as visiting MIT’s Wallace Astrophysical Observatory and the Museum of Science.

He said his main goal was to “help students become acclimated to MIT” and “see if the physics major is right for them” by “listening to undergraduates and professors talk about the interesting work they do” and “participate in lab tours.”
